

We strongly disagree with further media deregulation that will apparently be voted on in your June 2, 2003 meeting. We further disagree with the cloak of secrecy that has covered the items being voted on, resulting in a lack of public awareness of the issues and their ramifications.

We urgently call for 1)a delay in this important vote, 2)a widely-available list of items to be voted on, and 3)a large number of public forums in which these matters can be explained and debated. Since the airwaves belong to the public, doing so would be consistent with the DEMOCRACY in which we supposedly live.
